SUMMARY

B.Tech CSE student with a strong foundation in programming, algorithms, and data structures. Proficient in C, C++ and Python, with a focused interest in software development, data science, and emerging technologies. Demonstrates strong analytical skills, adaptability, and a professional approach, eager to contribute to real-world projects and further develop practical industry expertise.

TECHNICAL SKILLS

- **Programming Languages:** C, C++, Python, Javascript(E56+)[Basic]
- **Core Concepts:** Data Structures & Algorithms, Object-Oriented Programming (OOP), Problem Solving, Debugging
- **Development Tools:** Visual Studio Code, Git, GitHub
- **Technologies:** Basic SQL, HTML, CSS (Fundamentals)
- **Operating Systems:** Windows, Basic Linux Commands
- **Other:** UI/UX Design, Responsive Web Design, API Integration, OCR (pytesseract), Google Gemini AP
- **Soft Skills:** Teamwork & Collaboration, Problem Solving, Communication, Time Management.

PROJECTS

Fire Department NOC Automation Portal

- **Description :** A web-based platform designed to automate and simplify the Fire Department No Objection Certificate (NOC) application process. The portal allows citizens to submit applications, upload required documents, track real-time application status, and understand inspection workflows. The UI is built to reduce manual paperwork, increase transparency, and offer a smooth, user-friendly application experience.
- **My Role :** Worked as a Full-Stack Developer, contributing to both frontend and backend development of the portal. Built responsive user interfaces, implemented form workflows, and handled backend data processing. Also created a detailed project PPT explaining system architecture, feature flow, technical concepts, and overall workflow to support project presentation and documentation.
- **Tech Stacks :** HTML5, CSS3, JavaScript (ES6), Python, PowerPoint

UI HEIST Hackathon Project

- **Description :** A collaborative UI/UX design project created for the UI HEIST hackathon organized by the Resourcio Community. The challenge involved designing a complete user interface for a given real-world problem statement, focusing on clarity, usability, accessibility, and visual consistency
- **My Role :** Contributed to core UI/UX design decisions, wireframes, and layout structuring. Designed responsive desktop screens with proper spacing, alignment, color hierarchy, and component consistency.
- **Tech Stacks :** Figma

EDUCATION

Supreme Knowledge Foundation Group of Institutions

B.Tech in Computer Science and Engineering

2024-Present

ADDITIONAL INFORMATION

- **Language:** English, Hindi, Bengali
- Technical community involvement
- Hackathon participant (multiple events)
- UI/UX ideation and creative design
